

Additional Government Funding for Physical Education 2020-21

What is the Additional Government Funding for Physical Education?

The additional government funding for physical education, 'Sport Premium', was first given to school in November 2013 and is allocated to schools to enhance provision for sport.

School leaders can decide how the Sport Premium funding is best used to support pupils.

Schools are required to publish information online about how they have used the Sport Premium funding.

The 'Sport Premium' for the 2020-21 academic year was received in November 2020 and later in the spring term 2021.

What does Physical Education look like at St Mary's School?

Physical education and sport have a very high importance at St Mary's School. Teachers have very high expectations of pupils' ability to learn and develop new skills and they employ a range of activities to stimulate and challenge.

At Foundation Stage, physical development is integrated into the curriculum to meet the Early Learning Goals.

A broad and balanced scheme of work, reflecting the current National Curriculum requirements, is followed in KS1 and KS2 during two discreet weekly lessons, taught by a specialist PE teacher, from Moving Matters, and the class teacher.

Lessons are well planned, with a high level of quality resources which support teaching and enable pupils of all abilities to achieve very well. Lessons observations are carried out by the PE co-ordinator, the SLT and Moving Matters staff to monitor the extent to which teachers and coaches provide tasks to meet pupils' needs, how well they discuss pupils' progress and the level of subject knowledge demonstrated by the coaches and teachers.

In addition to the twice-weekly PE lessons, pupils also develop their skills in PE through various sports clubs and competitions. The pupils are offered sports clubs throughout KS1 and KS2. Sports clubs are led by coaches from Moving Matters and Mr. Elgey (PE coordinator), as well as St Mary's teachers and coaches from Surrey Cricket Club and other external sporting organisations.

St. Mary's has many school teams and regularly competes in competitions involving the following sports:

- | | | |
|--------------|--------------|------------|
| • athletics | • football | • netball |
| • basketball | • gymnastics | • rugby |
| • cricket | • hockey | • swimming |

St. Mary's football team compete in the Lambeth & Southwark Primary Schools Football League. St. Mary's girls football team competes in the Lambeth and Southwark Primary Schools Football League division for girls only football.

Due to the coronavirus restrictions, competitive sports have been postponed indefinitely. Due to social distancing measures, sports clubs and swimming lessons have also been postponed. PE provision is being maintained as best as possible within class bubbles during school hours or via remote learning.

How do we use the Additional Government Funding for PE and sport at St Mary's?

At our school we ensure that the Sport Premium supports pupils to do their best, make good progress, achieve high standards, enjoy sports and aim to sustain a healthy and active lifestyle.

During the academic year (2020/21) the school will use the Sport Premium to support pupils in the following ways:

- Moving Matters (MM) sports coach to teach lessons and work with staff to provide professional development
- Access to the MM website which includes lesson planning and activities for staff
- Purchasing additional resources for sports lessons
- Purchasing additional equipment for break times to allow for no cross contamination between class bubbles.

When restrictions are eased:

- After school clubs to recommence
- Access to MM CPD for staff
- Entry to competitions – MM, football league, School Games etc
- Swimming pool lessons/hire – summer term swimming catch up lessons for junior classes.
- Staff CPD / First Aid training
- Sport pitch hire for football league / sports day

Sport Premium Funding at St Mary's School 2020/21

Total number of pupils on roll (Spring Census 2020)	319
Total amount of PE funding (to be received)	£18,640 (Approximately £58 per pupil)

At St Mary's the achievement of all pupils in physical education is monitored and tracked so that any areas of concern can be addressed using a range of intervention approaches.

Most pupils make 'good' to 'outstanding' progress each year and quickly learn new skills and techniques. The progress is sustained over their time at the school and for many pupils, develops rapidly towards the end of KS2 due to additional learning in sports clubs and participation in school teams. All pupils are given challenging tasks to enable progression and lead to high levels of achievement. Those with special needs and disabilities are able to participate fully in lessons and activities through the support of additional adults and through planned tasks that meet their learning needs.

The Additional Government Funding for Physical Education Focus at St Mary's School 2019/20 (last academic year)

The additional funding helped us to achieve our aims for Physical Education at St. Mary's, which included:

- Ensuring excellent pupil participation, high attainment and outstanding progress for all pupils
- Training sports leaders (Buddies) to lead games in the playground
- Entering a wide variety of tournaments
- Giving opportunities to a greater number of teachers/ staff to lead teams at tournaments
- Organising a greater number of opportunities for pupils to be 'talent spotted' and admitted to external and in school sports clubs
- First Aid courses for staff
- Organising a greater number of sports clubs for Key stage One pupils
- Giving opportunities to a greater number of teachers to lead sports clubs

Success at St Mary's School 2019/2020

Achievement of targets

All of the targets above were achieved or on target to be achieved before lockdown measures began in March 2020.

Swimming Data – St Mary's School 2019-2020

Swimming was postponed due to coronavirus restrictions so there is no data for the academic year 2019/2020.
